

Do not let the Bell "Wolves" own the chicken coop you already allow them to dominate. Competition requires competitors to be alive. If the FCC lifts the dominant classification from the Local Exchange Carriers (Bells), it will limit competition in residential data services to a duopoly consisting of a Bell and a cable company. It will limit competition for most small business data services to the current monopoly.

Please don't kill innovation: the Bells killed data communication for years and years by not bringing new technologies to market. They tried to kill the Internet through FCC filings in the 1990's. Please DO NOT let the Bell cavemen of technology dominate our future.
